Summary

Software Developer with 2 years of experience. Focused on the development of web applications with Ruby. Currently working on a back-office tool for the insurance market with over 400 active users.

Education

University of Caxias do Sul
Computer Engineering — 2012 - 2013 and 2016 - 2018 (studying abroad in 2014/2015)

Gonzaga University
Computer Engineering, Brazil Scientific Mobility Program Scholarship — 03/2014 - 05/2015

Illinois Institute of Technology
Research Program, Computer Engineering - Databases / Data Exchange Scenarios — 06/2015 - 08/2015

Experience

Full Stack Developer, Proreg Técnica de Seguros
Caxias do Sul, Brazil — 02/2016 - now

I've been implementing solutions related to reports and inspections management for the insurance market. I mostly work on the backend, deploy/server issues and Javascript, but I also deal with general front-end tasks and database modeling occasionally.
- Learned more about Ruby on Rails, SQL, Versioning, Server/Deployment issues, Ubuntu Server, Design Patterns, TDD
- Created an application from scratch
- Migrated from the discontinued system to the new one
- Managed to make decisions about the stack

Front End Developer, Ditta Comunicação
Caxias do Sul, Brazil — 03/2012 - 12/2013

My focus was on front-end using HTML, CSS and Javascript. All websites were dynamic and used the MVC pattern. Most of the projects used the PHP framework Codeigniter.
- Developed most of the projects from scratch.

English Teacher, DO UP English for Life
Caxias do Sul, Brazil — 02/2016 - 05/2016

I taught adults from beginner to proficient level.
- Worked my interpersonal skills teaching people from different backgrounds and ages
